SpArc

A campaign marketplace engine powered by real engagement.

- Fund campaigns in USDC.
- Generate creator-facing briefs with Gemini.
- Watch clicks resolve into payouts on-chain.

▶ Speaker notes

Campaign marketing is still rigid and hard to trust

- Brands pay upfront without clear performance feedback.
- Creator campaigns are expensive and inflexible.
- Attribution is often incomplete or hidden.
- ROI is hard to verify.

▶ Speaker notes

A campaign wallet that pays for real behavior

- Campaigns are funded in USDC.
- Businesses can create and manage campaigns.
- Approved creators participate in the campaign.
- Clicks create instant micropayments.
- Conversions trigger attribution-based payouts.
- Every payout is verifiable on-chain.

Fund → **Click** → **Attribute** → **Pay** → **Verify**

▶ Speaker notes

SpArc gives managers a live campaign workspace

- Generate campaign briefs with Gemini.
- Track click events and micropayments.
- View attribution splits across creators.
- See payout execution and txHash proof.

▶ Speaker notes

Campaign marketing, redefined

- More flexible for brands.
- More accessible for creators.
- More transparent for everyone.
- Built for real-time, on-chain proof.

▶ Speaker notes

How it works:

- Gemini generates campaign-facing copy.
- Circle handles the USDC payment flow.
- Attribution and payouts remain deterministic.
- On-chain proof is live and verifiable.

Gemini | Circle USDC | Arc Testnet | Next.js

Why this model matters

- Lowers the barrier to entry for businesses
- Lowers the barrier to entry for creators
- Creates a more open marketplace
- Shifts the model from fixed sponsorships to accessible, behavior-based participation

Live demo: click → attribution → instant payout

- Open a funded campaign.
- Trigger creator clicks.
- Watch the attribution update.
- Confirm payout execution on-chain.
